

# Website Development Requirements Specification

## Billing Module, GSTR-2B, GST Liability, GST Return Dashboard & Client Portal

### Objective

Develop and implement the following enhancements in the Admin Portal, Client Portal, Dashboard, Billing Module, Reports, PDF formats, and Print layouts. These requirements are mandatory and should be implemented consistently throughout the entire application wherever applicable.

---

## 1. Document Number Format

### Requirement

Update the document numbering format from four digits to two digits.

#### Existing Format

- INV-0001
- BOS-0001
- DN-0001
- CN-0001
- QT-0001
- AMD-0001

#### Required Format

- INV-01
- BOS-01
- DN-01
- CN-01
- QT-01
- AMD-01

### Scope

The revised numbering format must be reflected consistently across the application, including but not limited to:

- Admin Portal
- Client Portal
- Dashboard

- Invoice Preview
  - PDF Documents
  - Print Format
  - Reports
  - Search Results
  - Export Files
  - Email Attachments
  - Notifications
  - Any screen where document numbers are displayed
- 

## 2. Billing Format Improvements

The billing format must follow the approved invoice design already shared.

### Required Changes

#### QR Code

- Remove the QR Code completely from all billing documents.

#### Amount in Words

- Retain the "Amount in Words" section. **(Proper medium box as per Amount not big)**

#### Authorized Signatory

Move the Seal and Authorized Signatory section to the bottom-right corner of the document immediately above the footer. **(Little Smaller Size, not too small)**

#### Footer

The footer should display:

- Generated by [www.abkhanassociates.com](http://www.abkhanassociates.com)
- Page Number

#### Layout

Maintain professional formatting with:

- Proper spacing
- Consistent alignment
- Uniform margins
- High-quality print layout
- Clean PDF formatting

## Applicable Documents

Apply these changes to:

- Tax Invoice
  - Bill of Supply
  - Debit Note
  - Credit Note
  - Quotation
  - Amendment Invoice
- 

## 3. Complete TDS/TCS Module

Develop a comprehensive TDS/TCS calculation module within the Billing System.

### Enable/Disable

Provide two independent checkboxes:

- TDS
- TCS

Only one calculation should apply based on the selected option.

---

### TDS Display

When enabled, display:

Less: TDS

---

### TCS Display

When enabled, display:

Add: TCS

---

### Section Master

Provide a configurable dropdown containing applicable TDS/TCS Sections. **(Sections List will provided)**

---

## Rate Population

After selecting a section:

- Applicable rate should populate automatically.
  - Rate should be read-only.
  - Manual editing should not be allowed.
- 

## Automatic Calculation

The TDS/TCS amount should recalculate automatically whenever any of the following changes:

- Invoice Amount
  - Taxable Value
  - GST Amount
  - GST Rate
  - Selected Section
- 

## Invoice Summary

The billing summary should automatically calculate:

Invoice Total

(-) Less: TDS

OR

(+) Add: TCS

Final Amount Payable

No manual calculations should be required.

---

## 4. Admin Portal – GSTR-2B Module

Create a dedicated GSTR-2B module under each client.

## Upload Process

The Admin should be able to:

- Select Financial Year
  - Select Tax Period (Month)
  - Upload GSTR-2B downloaded from the GST Portal (**Predefined Format, Copy and Paste Figures**)
  - Save data against the respective client
- 

## File Management

Provide the following functionality:

- Replace uploaded file
  - Delete uploaded file
  - Re-upload corrected file
- 

## 5. Client Portal – GSTR-2B

Provide a separate GSTR-2B menu in the Client Portal.

Clients should only be able to access GSTR-2B data uploaded by the Admin.

---

## Filters

Provide filters for:

- Financial Year
  - Tax Period (Month)
  - Supplier GSTIN
  - Supplier Name
  - Invoice Number
- 

## Invoice Details

Display:

- Supplier GSTIN
- Supplier Name
- Invoice Number

- Invoice Date
  - Taxable Value
  - CGST
  - SGST
  - IGST
  - Total GST
  - ITC Eligibility
- 

## Functions

Provide:

- Search
  - Sorting
  - Pagination
  - Excel Export
  - PDF Export
  - Print
- 

## 6. Invoice Matching System

Every GSTR-2B invoice should have a Match Status.

### Status Values

- Matched
- Unmatched

Clients should be able to manually mark invoices after comparing them with their Purchase Register.

---

### Dashboard Summary

Display:

- Total Invoices
- Matched Invoices
- Unmatched Invoices
- Matched ITC Amount
- Unmatched ITC Amount

Dashboard values should update automatically after every status change.

---

## 7. GST Liability Report

Create a dedicated GST Liability Report.

### Calculation

Net GST Liability

$\text{Net GST Liability} = \text{Output GST} - \text{Eligible Input Tax Credit (ITC)}$

---

### Display

Show:

- Total Output GST
  - Total Eligible ITC
  - Net GST Liability
- 

### Display Logic

If Output GST > Eligible ITC

Display:

GST Payable

If Eligible ITC > Output GST

Display:

Excess ITC Available / ITC Carry Forward

---

### Report Availability

Provide reports:

- Month-wise
  - Quarter-wise
  - Financial Year-wise
-

## Export Options

- Excel
  - PDF
  - Print
- 

## 8. Client Dashboard

Display real-time dashboard cards showing:

- Output GST
- Eligible ITC
- GST Payable
- Excess ITC Available
- Total GSTR-2B Invoices
- Matched Invoices
- Unmatched Invoices

Dashboard values should automatically update whenever:

- New GSTR-2B is uploaded
  - Matching Status changes
  - GST Liability changes
- 

## 9. Reports

Provide downloadable reports for:

- GSTR-2B Report
- GST Liability Report
- Invoice Matching Report

Each report should support:

- Excel
  - PDF
  - Print
-

## 10. General Development Requirements

The application should support:

- Responsive Design (Desktop, Tablet, Mobile)
  - Fast Loading
  - Optimized Performance
  - User-Friendly Interface
  - Strong Data Validation
  - Secure File Upload
  - Proper Error Handling
  - Audit Logging
  - Scalable Architecture
  - Future-ready configuration for GST, TDS/TCS Sections, Rates and Reports without major redevelopment
- 

## GST Return Dashboard & Client Portal Requirements

### 11. Admin Dashboard – GST Return Status

Develop a dedicated GST Return Dashboard in the Admin Portal providing a real-time overview of all client GST return activities.

---

#### Dashboard Summary Cards

##### Monthly Return Clients

Display:

- Total Monthly Clients
  - Monthly Returns Pending
  - Monthly Returns Filed
  - Monthly Returns Due Today
  - Monthly Returns Overdue
-

## Quarterly Return Clients

Display:

- Total Quarterly Clients
  - Quarterly Returns Pending
  - Quarterly Returns Filed
  - Quarterly Returns Due
  - Quarterly Returns Overdue
- 

## Overall Summary

Display:

- Total GST Clients
- Regular Clients
- Composition Clients
- Total Pending Returns
- Total Filed Returns

Clicking any summary card should open the relevant client list.

---

# 12. Client Registration Enhancement

While creating or editing a client, provide:

## GST Registration Type (Already mentioned)

- Regular
  - Composition
- 

If "Regular" is selected, display mandatory field: **(Missing)**

Return Filing Frequency

- Monthly
  - Quarterly
- 

If "Composition" is selected: **(Missing)**

- Filing Frequency should automatically become Quarterly.

- Only the Admin should be able to modify this setting.
- 

## 13. Client List View

Display the following columns in the Admin Portal:

- Client Name
- GSTIN
- Registration Type
- Filing Frequency
- Current Return Status
- Last Return Filed Month
- Next Due Month
- Pending Months Count

Use status indicators:

 Filed

 Due

 Pending / Overdue

---

## 14. Client Portal Dashboard

Clients should have access to a GST Return Dashboard displaying:

- Last GST Return Filed
- Current Return Status
- Pending Return Months
- Filed Return Months
- Next Due Date

Month-wise status should display:

- Filed 
  - Pending 
  - Overdue 
-

## 15. Invoice Lock After GST Return Filing

This is a mandatory feature.

Once the GST Return for a specific period is marked as Filed by the Admin:

- All invoices belonging to that GST period should automatically become Read Only.
- The client should not be able to Edit or Delete those invoices.

If the client attempts to edit a locked invoice, display the following message:

GST Return for this period has already been filed. This invoice cannot be edited. Please submit an Edit Request or issue an Amendment Invoice (Credit Note, Debit Note, or Revised Invoice), as applicable.

## 16. Dashboard Filters

Provide comprehensive filtering options across the Dashboard and Reports.

Filters should include:

- Financial Year
- GST Period (Month / Quarter)
- Registration Type
- Filing Frequency
- Return Status
- Client Name
- GSTIN
