Esa Dashboard for GST Composition scheme h toh

Client Portal – Profile Dropdown & Settings Structure

1. Top-Right Client Profile Dropdown

Dashboard ke top-right corner mein currently jo:

“Demo Client ▼”

display ho raha hai, usko **clickable profile dropdown** banana hai.

Client name ke saath avatar/initial bhi rahe:

D Demo Client ▼

Dropdown open hone par following 4 options proper icons ke saath show hon:

Profile

Business Profile

Client ki registered business information view karne ke liye.

Click karne par **Business Profile** page open ho.

Business Profile mein currently available details show hon:

- Legal Entity / Company Name
- Proprietor/ Authorized Signatory
- GSTN
- PAN

- Registered Address
- City
- Pincode
- State Code
- Contact Number
- Email

Ye information client ke liye **view-only** ho.

Change Password

Client apna login password change kar sake.

Click karne par dedicated **Change Password** screen/modal open ho.

Fields:

- Current Password
- New Password
- Confirm New Password
- Change Password button

Password successfully change hone ke baad proper success confirmation show ho.

Important: Business Profile page par alag se bada **“Change Password”** button rakhne ki zarurat nahi hai, kyunki ab ye option profile dropdown mein available hoga.

Settings

Client portal ki billing/invoice related settings ke liye ek consolidated **Settings** section open ho.

Settings ke andar following sections/tab/cards hone chahiye:

A. Invoice Branding

- Business Logo
- Authorized Signature
- Company Seal
- Upload / Replace file
- View Current

B. Bank Details

- Bank Name
- Branch
- Account Holder Name
- Account Number
- IFSC
- Account Type

- UPI ID

C. Invoice Settings

- Signatory Name
- Terms & Conditions

D. Document Numbering & Prefix Configuration

- Tax Invoice Prefix
- Bill of Supply Prefix
- Credit Note Prefix
- Debit Note Prefix
- Quotation Prefix

Example:

INV-0001

BOS-0001

CN-0001

DN-0001

QT-0001

Settings page par clearly show hona chahiye ki:

“Changes require administrator approval before they appear on invoices.”

Agar client koi setting change karta hai, toh status show ho:

Pending Approval

Approval ke baad:

Approved

Aur existing **“Last request approved”** status bhi maintain kiya ja sakta hai.

Logout

Dropdown ka last option:

Logout

Logout icon ke saath ho.

Logout par click karne par confirmation modal:

“Are you sure you want to logout?”

Buttons:

Cancel | Logout

Logout ke baad user ko secure login page par redirect karein.

2. Recommended Dropdown Design

Dropdown visually clean aur compact hona chahiye:

 Profile

 Change Password

 Settings

 Logout

4. Settings Page Layout

Settings ko ek hi long page mein unnecessarily scattered na rakhein.

Recommended structure:

Settings

Invoice Branding | Bank Details | Invoice Settings | Document Numbering

Ya left-side Settings submenu:

Settings

- Invoice Branding
- Bank Details
- Invoice Settings
- Document Numbering

Har section ko separate clean card mein rakhein.

▼

Billing Address

3) Billing (Sab jagah Date is format me hu (DD:MM:YYYY) and Centre Alignment me hu data and kuch Report PDF ya excel me export kar rhe toh ache se Tabular form me hoa chahiye :- Top Middle Company Name uske niche kaunse report h who Tabular bhi header acha formatting ho.

Quotation ye pehe tha but new site me nhi h who bhi add karu (Important)

The screenshot displays a web application interface for managing documents. At the top, there are tabs for 'All Documents', 'Tax Invoices', 'Bills of Supply', 'Debit Notes', and 'Credit Notes', along with a '+ Create Document' button and an 'Export Report' button. Below the tabs, there are summary cards for each document type: Total Documents (31), Tax Invoices (27), Bills of Supply (0), Debit Notes (3), and Credit Notes (1). A 'Quick Filters' section includes 'This Month' and 'Previous Month' buttons. A search bar is present with the placeholder 'Search by document no., party or GSTIN...'. Below the search bar are filters for 'Financial Year' (FY 2026-27), 'From Date' (01/04/2026), 'To Date' (31/03/2027), 'Payment Status' (All Status), and 'Document Type' (All Types). There are 'Apply Filters' and 'Clear Filters' buttons. The main table has columns: #, Invoice No., Date, Party, GSTIN, Taxable Value, GST, Total, Status, Created, and Action. The table contains 5 rows of data, all with 'Unpaid' status. At the bottom, there is a summary bar showing 'Total (Filtered Results)' with values for Taxable Value (₹33,57,100), GST (₹6,02,278), and Total (₹39,59,378). It also shows 'Showing 1 to 10 of 31 entries' and a pagination control for 'Rows per page' (10) and page numbers (1, 2, 3).

#	Invoice No.	Date	Party	GSTIN	Taxable Value	GST	Total	Status	Created	Action
1	INV-27	14 Aug 2026	Farhad	27QWERT1234P1ZP	₹15,00,000	₹2,70,000	₹17,70,000	Unpaid	14 Aug 2026 07:33 PM	View
2	INV-26	14 Aug 2026	Muhammad Farooq	09QWERT1234P1Z2	₹15,00,000	₹2,70,000	₹17,70,000	Unpaid	14 Aug 2026 07:32 PM	View
3	INV-25	14 Aug 2026	Farhad	27QWERT1234P1ZP	₹3,06,000	₹55,080	₹3,58,020	Unpaid	14 Aug 2026 12:26 PM	View
4	INV-24	14 Aug 2026	Farhad	27QWERT1234P1ZP	₹95,000	₹17,100	₹1,12,100	Unpaid	14 Aug 2026 12:24 PM	View
5	INV-23	14 Aug 2026	Muhammad Farooq	09QWERT1234P1Z2	₹56,100	₹10,098	₹66,198	Unpaid	14 Aug 2026 12:23 PM	View

Bilkul. Aapka requirement clear hai: All Documents, Tax Invoice, Bill of Supply, Debit Note aur Credit Note — sabhi tabs mein exactly same professional table structure/design rahe, sirf document-specific data aur Create button change ho.

Developer ko ye final implementation-ready description bhejiye:

Billing Section – Final Tab & Create Document Workflow

1. Common Table Design for All Document Tabs

All Documents, Tax Invoices, Bills of Supply, Debit Notes aur Credit Notes — sabhi pages par exactly same tabular layout, alignment, colours, spacing, typography, status badges, filters, pagination aur action-button design use hona chahiye.

Current approved table design ko common standard maana jaye.

Common Table Columns

For All Documents:

| Document No. | Date | Party | GSTIN | Taxable Value | GST | Total | Status | Created | Action

For individual document tabs, same structure maintain ho:

Tax Invoice

| Invoice No. | Date | Party | GSTIN | Taxable Value | GST | Total | Status | Created | Action

Bill of Supply

| Bill No. | Date | Party | GSTIN | Taxable Value | Total | Status | Created | Action

Bill of Supply mein GST column applicable na ho toh column ko blank/— rakha ja sakta hai, lekin overall table alignment consistent rehna chahiye.

Debit Note

| Debit Note No. | Date | Party | GSTIN | Taxable Value | GST | Total | Status | Created | Action

Credit Note

| Credit Note No. | Date | Party | GSTIN | Taxable Value | GST | Total | Status | Created | Action

2. Table Styling Must Remain Identical

Sabhi tabs mein:

- Dark blue table header
- White header text
- All columns center aligned
- Consistent row height
- White table rows
- Very subtle borders
- Light blue hover effect
- Rounded table container
- Blue invoice/document number
- Amounts properly formatted in ₹
- Total amount semi-bold
- Professional status badges
- Center-aligned View button
- Three-dot Action menu
- Same pagination design
- Same font and font size
- Same column spacing

User kisi bhi tab par jaye, usko table ka design visually identical feel hona chahiye.

3. Top Document Tabs

Billing section ke top par tabs:

All Documents | Tax Invoices | Bills of Supply | Debit Notes | Credit Notes

Selected tab:

- Dark blue background
- White text
- Slightly rounded corners

Unselected tabs:

- White background
- Dark text
- Subtle border

Tab change karne par same page layout rahe; sirf relevant document data load ho.

4. Create Document Button – IMPORTANT WORKFLOW

Top-right mein primary button:

+ Create Document ▼

Lekin iska behaviour selected tab ke according dynamic hona chahiye.

A. When user is on “All Documents” tab

Button:

+ Create Document ▼

Is button par click karne par dropdown open ho:

Create Document

 Tax Invoice

 Bill of Supply

 Debit Note

 Credit Note

User jis option ko select karega, usi document ka creation page open hoga.

Example:

All Documents → Create Document → Tax Invoice

→ Tax Invoice creation form open.

All Documents → Create Document → Debit Note

→ Debit Note creation form open.

5. When User is on Tax Invoices Tab

Agar user:

Tax Invoices

tab par hai, toh button:

+ Create Tax Invoice

hona chahiye.

Dropdown nahi hona chahiye.

Click karte hi directly:

Create Tax Invoice

page/form open ho.

6. When User is on Bills of Supply Tab

Button:

+ Create Bill of Supply

No dropdown.

Click → directly Create Bill of Supply form.

7. When User is on Debit Notes Tab

Button:

+ Create Debit Note

No dropdown.

Click → directly Create Debit Note form.

8. When User is on Credit Notes Tab

Button:

+ Create Credit Note

No dropdown.

Click → directly Create Credit Note form.

9. Final Behaviour Summary

Selected Tab	Button	Behaviour
--------------	--------	-----------

All Documents	+ Create Document ▼	Opens dropdown
---------------	---------------------	----------------

Selected Tab	Button	Behaviour
Tax Invoices	+ Create Tax Invoice	Directly opens Tax Invoice
Bills of Supply	+ Create Bill of Supply	Directly opens Bill of Supply
Debit Notes	+ Create Debit Note	Directly opens Debit Note
Credit Notes	+ Create Credit Note	Directly opens Credit Note

This rule is mandatory.

Individual document tabs par dropdown nahi hona chahiye.

10. Filters Also Remain Consistent

All tabs par same filter component maintain karein:

This Month | Previous Month

Search by document no., party or GSTIN

Financial Year

From Date

To Date

Payment Status

Apply Filters | Clear Filters

Individual tab par Document Type filter ki zarurat nahi hai, because tab itself already defines the document type.

For example:

Tax Invoices tab

Document Type filter hide/remove karein.

Debit Notes tab

Document Type filter hide/remove karein.

All Documents

Document Type filter:

All Types ▼

available rahe.

11. Action Column

Same action structure sabhi tabs mein maintain ho:

View | :

Three-dot menu document type ke according options show kare.

GST Compliance – Final Website Requirement

1. Main Navigation

Left sidebar mein GST ke liye sirf one main navigation item hona chahiye:

GST Compliance

GST Compliance ke andar expandable submenu:

- GST Filing
- GST Returns
- GSTR-2B Reconciliation

Sidebar structure

GST Compliance ▾

└— GST Filing

└— GST Returns

└— GSTR-2B Reconciliation

Important: GST Confirmation, GST Return aur GSTR-2B ko separate main sidebar navigation items ke roop mein nahi dikhana hai.

2. GST Compliance Overview

User GST Compliance par click kare toh ek professional overview/workspace open ho.

Header

GST Compliance

Manage GST filing, return status and GSTR-2B reconciliation in one place.

Right side:

GSTIN

27QWERT1234P1ZP

GST Profile Summary

Top par 4 compact cards:

Dealer Type

Regular Dealer

Filing Frequency

Quarterly

Last Filed Return

Aug 2026

Next Due Date

11 Sep 2026

Ye information GST Returns module ke existing GST Profile data se align honi chahiye.

3. Quick Access – GST Modules

Heading:

GST Compliance Overview

Neeche 3 equal-size professional cards:

 GST Filing

Submit your GSTR-1 filing request to your CA.

Button:

Open GST Filing →

 GST Returns

View your GST return filing status and filing history.

Button:

View GST Returns →

 GSTR-2B Reconciliation

Match purchase invoices and verify eligible ITC.

Button:

Open Reconciliation →

Ye teen cards equal width, equal height aur same design language mein hon.

4. Compliance Summary

Financial Year selector:

Financial Year: FY 2026–27 ▼

Uske neeche 4 summary cards:

Filing Requests

5

2

Pending with CA

3

ITC Matched

₹0

Numbers actual system data se dynamically calculate hon.

5. GST Filing – ONLY GSTR-1

Ye important requirement hai.

Page Title

GST Filing

Review your sales invoices and submit your GSTR-1 filing request to your CA.

Current uploaded filing page mein Financial Year, Filing Period, Return Type, Fetch Bills & Summary aur Past Filing Requests ka structure already hai.

Filing Form

Financial Year

FY 2026–27 ▼

Filing Period

Select Month ▼

Return Type

GSTR-1

Important: Return Type mein GSTR-1 & GSTR-3B nahi hona chahiye.

Sirf:

GSTR-1

show hona chahiye.

Button

Fetch Bills & Summary →

System selected month ke billing documents se relevant sales/billing summary fetch kare.

6. GSTR-1 Filing Request Summary

Fetch ke baad summary:

Billing Summary

Tax Invoices

23

Taxable Value

₹93,07,084

GST Amount

₹16,46,128.80

Total Invoice Value

₹1,09,53,212.80

Uske neeche:

Send GSTR-1 Filing Request

Primary blue button.

7. Past GSTR-1 Filing Requests

GST Filing page ke bottom par:

GSTR-1 Filing Requests

Table:

Request ID	Tax Period	Return	Bills	Total GST	Status	Submitted On	Action
REQ-0002	Jul 2026	GSTR-1	15	₹8,07,828	Pending CA Review	15 Aug 2026	View
REQ-0001	Aug 2026	GSTR-1	15	₹8,31,190.80	Pending CA Review	15 Aug 2026	View

Aapke current filing screen mein exactly Request ID, Period, Return Type, Bills, Total GST, Status aur Submitted On fields already present hain.

Status badges:

-  Pending CA Review
-  Approved by CA
-  Rejected
-  Filed

8. GST Returns

Page Title

GST Returns

View your GST return filing status and complete filing history.

Top profile:

Dealer Type | Filing Frequency | Last Filed Return | Next Due Date

Current GST Returns page already contains Dealer Type, Filing Frequency, Last Filed Return and Filing History.

Filing History

Table:

Tax Period | Return Type | Status | Filed On | ARN / Acknowledgement No. | Action

Example:

Tax Period	Return Type	Status	Filed On	Action
Aug 2026	GSTR-1	 Filed	14 Aug 2026	View
Jul 2026	GSTR-1	 Filed	14 Jul 2026	View

Only actual available filing data should be displayed.

9. GSTR-2B Reconciliation

Page Title

GSTR-2B Reconciliation

Match purchase invoices with GSTR-2B and track eligible ITC.

Top summary:

Total Invoices

Matched Invoices

Unmatched Invoices

Matched ITC Amount

Unmatched ITC Amount

Your current GSTR-2B module already uses these metrics.

Reconciliation Table

Supplier GSTIN | Supplier Name | Invoice No. | Invoice Date | Taxable Value | CGST | SGST | IGST | Total GST | ITC Eligibility | Match Status

Current GSTR-2B screen already follows this information structure.

10. Filters

GST modules mein filters consistent rakhein.

GST Filing

Financial Year | Filing Period

GST Returns

Financial Year | Tax Period | Return Type | Status

GSTR-2B

Financial Year | Tax Period | Match Status | Supplier

Each page:

Apply Filters | Clear Filters

11. Status Design

Entire GST Compliance section mein consistent badges:

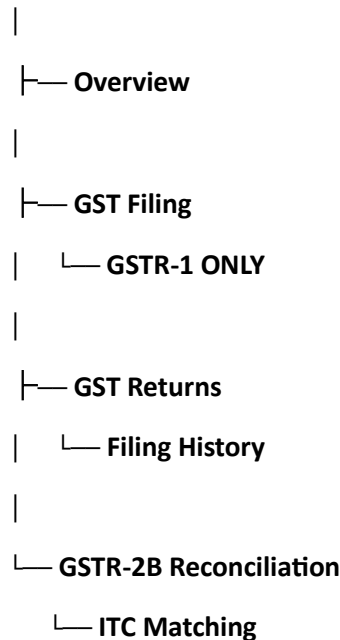

- ☒ Filed / Approved / Matched
- ☒ Pending / Pending CA Review
- ☒ Rejected / Unmatched
- ☐ Not Filed

Purple/blue ko informational status ke liye use kar sakte hain.

12. Important UX Rule

GST Compliance = Umbrella

GST COMPLIANCE

Overview optional hai, lekin main strongly recommend karunga because client ko login ke baad ek hi screen par GST compliance position mil jayegi.

13. Final Developer Instruction

“Create a single professional ‘GST Compliance’ section in the Client Portal. GST Filing, GST Returns and GSTR-2B Reconciliation must not appear as separate main navigation items. GST Compliance should act as the parent navigation with these three submenu items.

The GST Compliance overview should provide GSTIN, Dealer Type, Filing Frequency, Last Filed Return, Next Due Date, compliance summary and three quick-access cards for GST Filing, GST Returns and GSTR-2B Reconciliation.

GST Filing must manage ONLY GSTR-1. Remove ‘GSTR-1 & GSTR-3B’ from Return Type. The client selects Financial Year and Filing Period, fetches the billing/sales summary, reviews the data and submits a GSTR-1 filing request to the CA. Past GSTR-1 requests must be displayed with Request ID, Tax Period, Return Type, Bills, Total GST, Status, Submitted On and View Action.

GST Returns should show the client's GST profile and complete filing history/status. GSTR-2B Reconciliation should provide invoice matching, matched/unmatched invoices, ITC amounts and supplier-wise reconciliation.

All three modules must use the same professional design system: white cards, blue primary theme, consistent spacing, rounded corners, subtle borders/shadows, professional status badges, center-aligned tables where applicable, responsive layout and consistent filters/action buttons.”

5) Document Changes

[View All Amendments](#)

Document Changes

Currently, **Edit Request** and **Amendments** are shown as two separate modules. These should be combined into one centralized module named **“Document Changes”**.

The purpose of this module is to manage all document correction requests, Admin approvals, rejected requests and amendments from one place.

1. Sidebar / Navigation

Remove separate navigation items:

- Edit Request
- Amendments

Create only one navigation item:

Document Changes

Subtitle:

Manage document edit requests, approvals and amendments in one place.

2. Document Changes — Main Page

At the top, show summary cards:

- Pending Requests
- Approved Requests
- Rejected Requests

- **Amendments Created**

Below the summary cards, provide two tabs:

Edit Requests | Amendments

This keeps both functions under one module while still maintaining a clear separation between the two workflows.

3. Edit Requests Tab

This tab should be used when a user wants to correct an already-issued document.

Create Edit Request

Provide the following fields:

Document Type

- Tax Invoice
- Bill of Supply
- Debit Note
- Credit Note

Invoice / Bill Number

Provide a **Fetch** button.

After entering the document number and clicking Fetch, the system should fetch the original issued document.

Reason for Edit

Dropdown options such as:

- Incorrect GST Rate
- Incorrect Quantity
- Incorrect HSN/SAC
- Incorrect Customer Details
- Incorrect Taxable Value
- Incorrect Invoice Details
- Other

Remarks

Allow the user to explain the correction required.

Important Rule

Issued documents **must not be directly editable**.

The user must submit an **Edit Request for Admin approval**.

4. My Edit Requests

Below the Create Edit Request section, show a table:

Request ID Date & Time Document Type Document No. Customer Reason Status Action

Status should be clearly displayed as:

- Pending
- Approved
- Rejected

Action:

View

If an Edit Request is rejected, provide:

Create Amendment

This follows the existing workflow where an issued document requires an approval request and a rejected request can proceed to amendment.

5. Amendments Tab

The second tab should contain all documents for which an amendment can be created or is already in the amendment workflow.

Search & Filters

Provide:

- Search by Document Number / Customer
- Document Type
- Date Range
- Amendment Status
- Edit Request Status
- Apply
- Reset

Amendment Table

Document No. Date Document Type Customer Original Amount Amendment Status Action

Example statuses:

- Available
- Draft
- Pending Approval
- Approved
- Completed

Actions:

- **Create Amendment**

- **Continue**
- **View**

The existing Amendment page already displays document number, date, customer, amount, status and a Create Amendment action; retain this basic functionality but bring it inside the new Document Changes module.

6. Amendment Creation

When the user clicks **Create Amendment**, open the original document details.

Show the original document information clearly:

- Document Number
- Document Date
- Customer
- Original Taxable Value
- Original GST
- Original Total
- Original Line Items

The amendment should remain **linked to the original document**.

Show the correction clearly as:

Original Value → Revised Value

For example:

GST Rate: 18% → 12%

Taxable Value: ₹1,00,000 → ₹90,000

This makes it clear what has been changed.

Party-wise Detail — Document Drill-Down & Export

In the **Party-wise Detail** report, the **Documents count** should be a clickable hyperlink.

Example:

ABDULBASIT KHAN | 11 Documents →

On Clicking “11 Documents”

Open a **Party Document Details** view/modal showing **all documents issued to that particular party** for the selected Financial Year and Date Range.

The detail view should display:

- Party Name
- Financial Year
- From Date
- To Date
- Total Documents

Document Details Table

Document Type Document No. Date Taxable Value CGST SGST IGST Total

All documents related to that party within the selected period should be displayed in a clean, professional tabular format.

Export Options

Important: Export options should be available **inside the Party Document Details view**, after clicking the Documents hyperlink.

Top-right:

[Export Excel] [Export PDF] [Close]

Export Excel

On clicking **Export Excel**, download an Excel file containing **only the documents of the selected party** displayed in the detail view.

Export PDF

On clicking **Export PDF**, generate a professionally formatted PDF containing:

- Party Name
- Financial Year
