

GST RETURNS

GSTR-1 & GSTR-3B — Developer Implementation Guide

Objective: Keep GSTR-1 and GSTR-3B inside a single GST Returns module, while enforcing a mandatory GSTR-2B reconciliation check before any GSTR-3B filing request or final filing confirmation.

1. Final Navigation Structure

GST Compliance	Menu
GSTR-2B	Existing separate page
GST Returns	Single parent module
→ GSTR-1	Internal tab only
→ GSTR-3B	Internal tab only
GST Filing Confirmation	Existing separate page

Important: Do not show GSTR-1 or GSTR-3B as separate items in the left navigation bar.

2. GST Returns Landing Page

When the user clicks GST Returns, open the GST Returns workspace with an internal tab/bar:

[GSTR-1] [GSTR-3B]

Default tab: GSTR-1. Clicking GSTR-1 or GSTR-3B opens the respective existing page.

Preserve the existing visual language shown in the supplied screenshots: Financial Year selector, GSTIN badge, dealer/frequency summary, information banner, filing-period table, status badges and action buttons.

3. Existing UI Reference — GSTR-1

Use the uploaded GSTR-1 screen as the visual reference. Do not redesign the page unnecessarily; the main change is its placement under the GST Returns parent module.

 All dates are in format: DD:MM:YYYY | All times are in 12-hour format (hh:mm AM/PM) | All table data is center aligned

4. Existing UI Reference — GSTR-3B

Use the uploaded GSTR-3B screen as the visual reference. Keep the same table and status presentation, but connect its request action to the reconciliation validation described below.

5. GSTR-1 Workflow

GSTR-1 should retain its normal filing workflow. GSTR-2B reconciliation is not a blocker for raising the GSTR-1 filing request.

Request GSTR-1 Filing → create/process the request according to the existing GSTR-1 workflow.

6. GSTR-3B — Mandatory Reconciliation Gate

Before creating a GSTR-3B filing request, the system must validate the reconciliation status of the applicable GSTR-2B period(s). This validation must happen on the backend/API as well as in the frontend.

6.1 If Reconciliation Is Pending

Do not create the filing request. Show a blocking popup:

△ GSTR Reconciliation Pending

GSTR reconciliation is pending for the selected period. Please complete GSTR-2B reconciliation before raising the GSTR-3B filing request.

Buttons: View Reconciliation | Close. View Reconciliation should open the relevant GSTR-2B reconciliation screen/period.

6.2 If Reconciliation Is Completed

Allow the filing request and show a success notification:

✓ Reconciliation Completed

GSTR reconciliation for the selected period has been completed. You can now raise the filing request for GSTR-3B.

The GSTR-3B period row should then show an appropriate completed/ready status and the request action should be enabled.

7. Monthly Filing Frequency Logic

For a monthly taxpayer, GSTR-1 and GSTR-3B periods are monthly. The GSTR-3B request for a period must check the corresponding monthly GSTR-2B reconciliation.

GSTR-3B: June 2026 → Check GSTR-2B Reconciliation: June 2026 → Pending = Block / Completed = Allow

8. Quarterly / QRMP Filing Frequency Logic

For a quarterly/QRMP taxpayer, the GSTR-3B UI may show the quarter as one filing period, e.g. Apr-Jun 2026. However, the reconciliation engine must not treat GSTR-2B as a single quarterly statement. The applicable monthly GSTR-2B reconciliation records within the quarter must be checked.

Example: GSTR-3B Apr-Jun 2026 → check April 2026 + May 2026 + June 2026 GSTR-2B reconciliation.

If even one required monthly reconciliation is pending, the quarterly GSTR-3B request must remain blocked.
