Shipping address if different from billing address

Billing Address: Max 100 characters including spaces, with live counter 0/100 → 100/100; no characters allowed beyond 100.

Once Billing Address is entered, Shipping Address auto-fills with the same address.

Shipping Address remains fully editable, with the same 100-character limit and live counter.

If Billing Address changes, Shipping Address auto-updates only until the user manually edits it; after manual editing, Shipping Address must remain unchanged.

GST Filing – Return Type & Period Logic

1. Return Type Dropdown

- Regular
 - GSTR-1
 - GSTR-3B
- Composition
 - CMP-08
 - GSTR-4

2. Regular – GSTR-1

- After selecting **GSTR-1**, Filing Period = Monthly.

3. Regular – GSTR-3B

- Filing Period should depend on the taxpayer's **GSTR-2B frequency**:
 - GSTR-2B Monthly → GSTR-3B Monthly
 - GSTR-2B Quarterly → GSTR-3B Quarterly

4. Composition – CMP-08

- GSTR-2B does **not** apply.
- Filing Period should directly be **Quarterly**.

5. Composition – GSTR-4

- Filing Period should be **Annual**, displayed as the **Financial Year**, e.g. 2026–2027.

The screenshot shows a form titled "1. Period Selection". It contains three main input fields: "Financial Year", "Filing Period (Month) *", and "Return Type". The "Financial Year" dropdown menu is open, showing options for "2026-2027", "2025-2026" (which is highlighted with a red circle), and "2026-2027". Below the dropdown is a link labeled "Past GSTR-1 Filing Requests". To the right of the "Financial Year" field is the "Filing Period (Month) *" field, which is currently empty and has a calendar icon. To the right of that is the "Return Type" dropdown, which is set to "GSTR-1". To the right of the "Return Type" field is a blue button labeled "Fetch Bills & Summary".

Past GSTR-1 Filing Requests --- **Filing Requests**

GSTR-3B Filing Request – GSTR-2B Reconciliation Logic

- When a user raises a **GSTR-3B Filing Request**, the system should first check the **GSTR-2B status for the selected period**.
- If GSTR-2B contains bills, the request should remain **“Reconciliation Pending”** until the reconciliation is completed/updated by Admin.
- In the **Admin Portal**, provide a simple status option for each period:
 - **GSTR-2B Bills Available**
 - **No Bills in GSTR-2B**
- If Admin selects **“No Bills in GSTR-2B”** for a particular period, the system should automatically treat reconciliation as **not required** for that period.
- The user should then be able to **submit the GSTR-3B Filing Request directly** from the Client Portal based on the Admin’s **“No Bills”** confirmation.
- This status should be **period-wise**, so it applies only to the specific Financial Year and Filing Period selected.

Mark Paid – Amount Reflection / Calculation Error

- Currently, when a bill is marked **“Mark Paid”** from the **Outstanding** section, all amounts in the following sections become **Zero**:
 - **GST Summary**
 - **HSN/SAC Summary**
 - **Party-wise Details**
- When the same bill is changed back to **“Mark Unpaid”**, all amounts are reflected correctly.

Required Fix

- **Payment status (Paid/Unpaid) must not affect the billing amount, GST calculation, HSN/SAC Summary, or Party-wise Details.**
- Marking an invoice as **Paid** should only update its **payment/outstanding status**.
- The original **Taxable Value, GST, Invoice Value, HSN/SAC and Party-wise amounts must remain unchanged** and continue to reflect correctly in all reports.
- Marking the invoice as **Unpaid** should also retain the same billing and GST amounts.

Composition Dealer – GSTR-2B Logic

- If the taxpayer is registered under the **Composition Scheme**, **GSTR-2B reconciliation is not applicable**.
- The system should **automatically skip all GSTR-2B-related checks, reconciliation, and pending status** for Composition Dealers.
- For **CMP-08**, the filing period should be **Quarterly** and the user can directly raise the filing request.
- For **GSTR-4**, the filing period should be **Annual**, based on the Financial Year (e.g., 2026–2027).

6) Admin have Full Access

Admin – Full Billing Access & Control

- Admin User should have full access and control over all bills/invoices created by Clients.
- Admin can View, Edit, Delete, or Modify any bill created by any Client.
- Admin should be able to change the Invoice Number and Invoice Date whenever required.
- If an invoice is cancelled/incorrect, Admin should be able to edit the invoice and move it back to Draft status.
- Once moved to Draft, the Client can access it and make the required changes/recreate the bill as needed.
- All Admin changes should automatically reflect across Billing, GST Summary, HSN/SAC Summary, Party-wise Details, Outstanding and other related reports.
