

when i login in admin portal this dashboard should be shown like this one

Add New Client Profile

The **Add New Client Profile** module enables the Administrator to create and manage a comprehensive digital profile for every client from a single, centralized platform. It securely stores personal information, business details, statutory registrations, banking information, and portal credentials, ensuring efficient client management and seamless compliance.

Create Side Bar with Tab:- (Left Side) Sidebar Navigation

- 1) Personal and Business Information
- 2) Registration and Compliance Details
- 3) Bank Account Details
- 4) Client Login Credentials
- 5) Client's Company Logo, Signature and Seal

under respective tab i can above given informations

1) Personal & Business Information

The Administrator can record complete client and business information, including:

- * Client Name
- * Business Name
- * Constitution Type
- * Proprietorship

- * Partnership Firm
- * Limited Liability Partnership (LLP)
- * Private Limited Company
- * One Person Company (OPC)
- * Trust
- * Society
- * Business Type
- * Date of Incorporation
- * Date of Birth (for Individual Clients)
- * Mobile Number
- * Alternate Mobile Number
- * Email ID
- * Alternate Email ID
- * Office Address
- * City
- * State
- * Pincode
- * Country
- * Website

This information serves as the primary client master record and is automatically utilized throughout the system for taxation, accounting, invoicing, compliance, and reporting.

2) Registration & Compliance Details

Store all statutory registration details and portal credentials securely in one place for quick access and effective compliance management.

The Administrator can maintain the following information:

- * PAN Number
- * Aadhaar Number
- * GSTIN
- * GST Portal Username
- * GST Portal Password
- * TAN Number
- * TAN Portal Password
- * Income Tax Portal Password
- * UDYAM Registration Number
- * Shop & Establishment Registration Number
- * IEC (Import Export Code)
- * CIN (Corporate Identification Number)
- * LLPIN
- * Professional Tax Registration Number
- * ESIC Registration Number
- * PF Registration Number

A centralized compliance database helps simplify return filing, statutory registrations, audit procedures, and regulatory compliance.

3) Bank Account Details

The Administrator can add ****one primary bank account**** for each client by entering:

- * Bank Name
- * Branch
- * Account Holder Name
- * Account Number

- * IFSC Code
- * SWIFT Code
- * Account Type
- * UPI ID
- * QR Code Upload

The saved bank account will automatically appear on all invoices, tax invoices, debit notes, credit notes, quotations, and other printable documents generated for that client, ensuring consistent and accurate banking information without manual entry.

4) Client Login Credentials

Each client is provided with a dedicated login to securely access the Client Portal.

The Administrator can create:

- * Client ID (Auto-Generated or Manually Created)
- * Password

Using these credentials, clients can securely log in to their dashboard to:

- * Generate Tax Invoices
- * Generate Debit Notes
- * Generate Credit Notes
- * Generate Bill of Supply
- * View and Download Invoices
- * Access Business Information
- * Download Shared Documents
- * Track Invoice History
- * View Compliance Status
- * Access Other Services Provided by the Firm

5) Client's Company Logo, Signature and Seal (---automatically appear on all invoices, tax invoices, debit notes, credit notes, quotations, and other printable documents generated for that client, ensuring consistent and accurate banking information without manual entry.)

Client Management Module

The **Client Management** module provides a centralized platform for managing all client records within the Admin Portal. It enables the Administrator to organize clients based on their current service status, ensuring efficient client administration, quick access to information, and proper maintenance of both active and historical client records.

Dashboard Overview

The Dashboard shall display the following client statistics in real time:

- **Total Clients** – Displays the total number of registered clients, including both Active and Inactive clients.
- **Active Clients** – Displays the number of clients who are currently availing one or more services from the firm.

- **Inactive Clients** – Displays the number of clients who are no longer availing any services but whose records are retained for future reference.

The dashboard statistics shall automatically update whenever a client's status is changed.

Client Status Management

Each client profile shall include a **Client Status** field with the following options:

-  **Active** – Indicates that the client is currently receiving services from the firm.
-  **Inactive** – Indicates that the client is no longer receiving services from the firm.

A **Status Toggle** button shall be available on both the **Client Listing** page and the **Client Profile** page, allowing the Administrator to change a client's status instantly.

Example:

-  **Active** → Click to mark the client as **Inactive**
-  **Inactive** → Click to reactivate the client as **Active**

Changing the client status shall:

- Automatically update the Dashboard statistics.
 - Move the client to the appropriate Active or Inactive client list.
 - Retain all client information, documents, and historical records.
 - Never permanently delete any client data.
-

Search, Filter & Sorting

To enable quick access to client records, the Client Management module shall provide advanced search and filtering capabilities.

Global Search

The Administrator should be able to search clients using any of the following:

- Client Name
- Business Name
- Client ID
- PAN Number
- GSTIN
- TAN Number
- Mobile Number
- Email Address

Filters

The Administrator should be able to filter client records by:

- Client Status (Active / Inactive)
- Constitution Type
- Registration Type (GST, PAN, TAN, etc.)
- Date of Registration (Optional)

Sorting

Client records should be sortable by:

- Client Name
 - Client ID
 - Date Created
 - Last Updated
-

Active Clients

The **Active Clients** section shall display only those clients who are currently availing services from the firm.

The Administrator shall be able to:

- View complete client profiles.
- Change the client status to **Inactive** whenever the client discontinues services.

Inactive Clients

The **Inactive Clients** section shall display clients who are no longer availing services from the firm. Inactive client records shall remain securely stored within the system and shall not be permanently deleted.

The Administrator shall be able to:

- View complete inactive client profiles.
- Restore an inactive client by changing the status back to **Active**.

Functional Requirements

The Client Management module shall ensure that:

- Every client is categorized as either **Active** or **Inactive**.
- A client can be activated or deactivated at any time by the Administrator.
- Status changes are reflected immediately throughout the system.
- The **Total Clients** count always includes both Active and Inactive clients.
- No client information is deleted when the status changes.
- All client records, credentials, statutory details, and uploaded documents remain securely preserved regardless of client status.

Client Dashboard & Billing Reports

Overview

When the Administrator clicks on any client from the **Client Management** module, the system shall open a dedicated **Client Dashboard** that provides a complete overview of the client's billing activities, GST summaries, invoice statistics, and downloadable reports. The dashboard shall serve as a centralized reporting interface, enabling the Administrator to monitor business transactions, analyze tax data, and generate reports for any selected period.

Dashboard Summary Cards

The Client Dashboard shall display the following real-time summary cards:

- Total Tax Invoices Issued
- Total Bills of Supply Issued
- Total Debit Notes Issued
- Total Credit Notes Issued
- Total Documents Issued
- Total Invoice Value
- Total Taxable Value
- Total CGST
- Total SGST
- Total IGST
- Total Cess (if applicable)
- Total GST Liability

All summary cards shall automatically update based on the selected reporting period.

Billing Summary

The Billing Summary section shall provide a consolidated overview of the client's billing data, including:

- Total Number of Tax Invoices
- Total Number of Bills of Supply
- Total Number of Debit Notes
- Total Number of Credit Notes
- Gross Invoice Value
- Taxable Turnover
- CGST Amount
- SGST Amount
- IGST Amount
- Cess Amount (if applicable)
- Total GST Liability
- Net Invoice Value

HSN/SAC Summary Report

The system shall automatically generate an HSN/SAC-wise summary report containing:

- HSN/SAC Code
- Description of Goods or Services
- Unit of Quantity Code (UQC)
- Quantity
- Taxable Value
- CGST
- SGST
- IGST
- Cess
- Total GST
- Total Invoice Value

The HSN Summary shall be available for viewing online and exporting to Excel.

Report Period Selection

The Administrator shall be able to generate reports using predefined or custom date ranges.

Supported filters:

- Today
- Yesterday
- This Week
- This Month
- Last Month
- Quarterly
- Financial Year
- Custom Date Range

Changing the reporting period shall automatically refresh all dashboard statistics, summaries, charts, and reports.

Monthly Report

The Monthly Report shall include:

- Number of Tax Invoices Issued
- Number of Bills of Supply Issued
- Number of Debit Notes Issued
- Number of Credit Notes Issued
- Monthly Taxable Turnover

- Monthly Invoice Value
 - Monthly CGST
 - Monthly SGST
 - Monthly IGST
 - Monthly Cess
 - Monthly GST Liability
-

Yearly Report

The Yearly Report shall provide:

- Total Documents Issued
 - Total Tax Invoices
 - Total Bills of Supply
 - Total Debit Notes
 - Total Credit Notes
 - Annual Taxable Turnover
 - Total Invoice Value
 - Total CGST
 - Total SGST
 - Total IGST
 - Total Cess
 - Annual GST Liability
 - Month-wise Sales Summary
 - Month-wise GST Summary
-

Reports & Export

The system shall allow the Administrator to export reports in Microsoft Excel (.xlsx) format.

Available exports shall include:

- Invoice Register
- Tax Invoice Register
- Bill of Supply Register
- Debit Note Register
- Credit Note Register
- Billing Summary
- HSN/SAC Summary
- GST Summary
- Monthly Report
- Yearly Report

Each exported report shall include the selected reporting period, client details, and report generation date.

Bulk Invoice Download

The system shall provide a **Download ZIP** feature for bulk invoice downloads.

The Administrator shall be able to:

- Select a reporting period.
- Select a custom date range.
- Download all invoices in a single ZIP file.
- Download only Tax Invoices.
- Download only Bills of Supply.
- Download only Debit Notes.
- Download only Credit Notes.
- Download all billing documents together in one ZIP archive.

Each document shall be downloaded in PDF format using its original file name (e.g., Invoice Number, Invoice Date, and Client Name).

Search & Advanced Filters

The Client Dashboard shall provide advanced search and filtering options, including:

- Financial Year
 - Month
 - Quarter
 - Custom Date Range
 - Document Type
 - Invoice Number
 - HSN/SAC Code
 - GST Rate
 - Place of Supply (Optional)
-

Dashboard Analytics

The dashboard shall include graphical analytics to help visualize billing and tax information.

Suggested charts include:

- Monthly Sales Trend
- Monthly Invoice Count
- Taxable Turnover Trend
- GST Collection (CGST, SGST & IGST)
- Invoice Type Distribution (Tax Invoice, Bill of Supply, Debit Note, Credit Note)
- HSN-wise Sales Distribution

All charts shall update dynamically based on the selected reporting period.

Functional Requirements

The Client Dashboard shall:

- Display real-time billing and GST statistics.
- Generate billing summaries automatically.
- Prepare HSN/SAC-wise summaries.
- Generate monthly, quarterly, and yearly reports.
- Support custom date-range reporting.
- Export all reports to Excel.
- Download bulk invoice PDFs in ZIP format.
- Provide advanced search and filtering.
- Display graphical analytics for sales and GST reporting.
- Ensure all reports are generated client-wise based on the selected reporting period.
